EDUCATION

American International University–Bangladesh (AIUB)

Bachelor of Science in Computer Science and Engineering

Expected 2026

Dhaka, Bangladesh

PROJECTS

- **University Canteen Management System** | *Next.js, NestJS, PostgreSQL, TypeScript, JWT* [Live](#) | [Repo](#)
 - Engineered a full-stack canteen ordering platform with JWT authentication and role based access control (RBAC) across 3 user roles.
 - Designed 7 RESTful API modules (Auth, Menu, Orders, Reports) using NestJS, TypeORM and PostgreSQL with automated email notifications.
 - Built a responsive Next.js frontend enabling real-time order tracking for 3 user roles, with secure password hashing (bcrypt) and DTO-based input validation.
- **ShopSphere** | *NestJS, PostgreSQL, Prisma, TypeScript, JWT, Cloudinary* [Live](#) | [Repo](#)
 - Architected a normalized PostgreSQL schema (10+ tables) with Prisma ORM, implementing JWT based authentication with role based access control (Admin/Customer) and bcrypt password hashing.
 - Implemented Prisma transaction based checkout across 10+ database tables, including a coupon discount engine and a verified purchase review system with server side order validation.
 - Developed an admin analytics dashboard and documented 40+ REST APIs with Swagger, hosted on Railway and Vercel.
- **Movigo AI** | *Python, Scikit-learn, Pandas, NumPy, Streamlit, TMDB API* [Live](#) | [Repo](#)
 - Developed a content-based movie recommendation engine using CountVectorizer and Cosine Similarity on a dataset of 4,800+ movies, supporting search across 6+ languages including English, Hindi and Korean.
 - Integrated the TMDB API to fetch real-time posters and metadata for 4,800+ movies, powering an interactive Streamlit app with personalized recommendations.
- **Personal Portfolio Website** | *React, Vite, Tailwind CSS* [Live](#) | [Repo](#)
 - Built a full-stack portfolio website with 7 dynamic sections (Hero, About, Skills, Projects, Timeline, Certifications, Contact) using React, TypeScript, TanStack Start/Router and Vite.
 - Optimized SEO/Open Graph metadata and shipped via Vercel CI/CD on a custom domain for fast, reliable delivery.
- **SkyCast** | *HTML, CSS, JavaScript, OpenWeather API* [Live](#) | [Repo](#)
 - Engineered a responsive weather application supporting city-based search across 200,000+ global locations using the OpenWeather API.
 - Integrated live weather conditions, 5-day forecasting and dynamic weather visualization with real-time rain animation.
 - Crafted a modern glassmorphism interface with dark/light mode and responsive layouts for desktop and mobile.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, C#, C++
- **Frontend:** React, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** NestJS, Node.js, REST APIs
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Developer Tools:** Git, GitHub, VS Code, Linux, Postman, Vite

CERTIFICATIONS

- Cisco Networking Academy – IT Essentials: PC Hardware and Software (2022)
- Certificate of Appreciation – Science Poster Contest, AIUB (2022)
